IRA JESICA JANUARI S.

Database Systems | Data Analysis | AI / Machine Learning

Yogyakarta, Indonesia | +62 857-0497-8100 | irajesicajanuaris@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Information Technology graduate from Universitas Muhammadiyah Yogyakarta with a GPA of 3.77/4.00, holding practical experience in database systems, data analysis, and artificial intelligence. Holds a BNSP certified Database Administrator credential with hands on experience in database design, implementation, and management. Experienced in data preprocessing, feature engineering, and statistical analysis to generate data driven insights. Skilled in developing AI powered mobile and web applications using Deep Learning and Computer Vision, complemented by hands on experience in front-end development. Has published research at an international conference (ICOSA) and holds a registered software copyright. Resilient, adaptive, solution-oriented, and eager to learn new technologies.

EDUCATION

Bachelor of Information Technology Sept 2022 - 2026

Universitas Muhammadiyah Yogyakarta

- Cumulative GPA: 3.77/4.00
- Relevant Coursework: Database Administration, Database Implementation, Big Data Analysis, Cloud Database, Cyber Security, Computer Vision, Web Application Development, and Software Testing and Quality Assurance.

WORK EXPERIENCE

Front-End Developer Intern Oct – Dec 2025

Directorate of Digital Innovation, Universitas Muhammadiyah Yogyakarta

- Developed and maintained over 15 responsive web pages for the Universitas Muhammadiyah Yogyakarta Marketplace using HTML, CSS, JavaScript, and Bootstrap.
- Implemented responsive UI components ensuring consistent user experience across multiple devices demonstrating adaptive problem-solving in a fast-paced development environment.

PROJECTS

Web-Based Corn Leaf Disease Detection System 2026

International Conference Presentation — ICOSA 2026

Python | Flask

- Developed a web-based disease detection system, achieving 97.31% test accuracy across 4 classes on 4,188 images, with an interactive Flask web application featuring confidence scoring and treatment recommendations.
- Built a Flask application with image upload, top-three predictions, confidence scores, “UNCERTAIN” status, and treatment recommendations to support faster and more informed initial disease assessment.

AI Based Mobile Application for Real-Time Corn Leaf Disease Detection 2026

Python | Flutter | MySQL | Node.js

- Developed an AI-powered mobile application to detect and classify four corn leaf conditions, achieving 0.990 precision, 0.983 recall, and 0.993 mAP50.
- Implemented camera and gallery detection, bounding boxes, confidence scores, detection history, and early treatment recommendations, integrated TensorFlow Lite, Node.js REST API, and MySQL to support practical mobile-based preliminary assessment.

Depression Classification among University Students 2026

Python | Pandas | Matplotlib | Scikit-learn

- Built a binary classification pipeline using Logistic Regression and Random Forest on 101 survey records with 11 features, achieving 81.0% test accuracy.
- Applied data preprocessing, feature engineering, stratified cross-validation, and feature-influence analysis to generate data-driven insights for early screening research, rather than clinical diagnosis.

Village Financial Recording Mobile Application 2026

Flutter | Firebase | MySQL

- Developed a mobile application for village financial transaction recording and reporting.
- Registered as a copyrighted computer program by the Direktorat Jenderal Kekayaan Intelektual (DJKI).
- Registration No.: EC002026071168

CERTIFICATIONS

BNSP Certified Database Administrator (CDBA) 2026
Badan Nasional Sertifikasi Profesi (BNSP)

- Demonstrated competency in SQL, database design, entity relationship modeling (ERD), backup and recovery management, data structure implementation, and database maintenance planning.

Hak Cipta Program Komputer (Software Copyright) 2026
DJKI Kementerian Hukum dan HAM RI

- Village Financial Application, Registration No.: EC002026071168

Conference Presentation – International Conference on Sustainable Agriculture (ICOSA) 2026

- Presented research findings on a ConvNeXt-Small-based web application for corn leaf disease detection.
- Paper accepted for publication in the conference proceedings, forthcoming December 2026.

ORGANIZATIONAL EXPERIENCE

Staff, Internal & Eksternal Affairs 2023 - 2024
DPM faculty of Engineering – Universitas Muhammadiyah Yogyakarta

- Coordinated communication between 200+ students and faculty administration.
- Organized mid-term and monthly evaluations to improve organizational performance.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, PHP, SQL, Dart.
- Frameworks & Libraries: Flutter, Flask, Bootstrap, OpenCV, PyTorch, TensorFlow.
- Data & AI : Pandas, Matplotlib, Scikit-Learn.
- Database: MySQL.
- Tools & Technologies: Git, GitHub, Visual Studio Code, Android Studio.
- Languages: Indonesian (Native), English (Intermediate).
